(54) Title: AN OSTOMY SUPPORT GARMENT

(57) Abstract: An ostomy support garment in the form of a material having a hole for receiving a stoma, said hole having a stabilised edge wherein the edge is provided with an element allowing an increase or reduction of the length of the edge of the hole and providing a snug fit to the stoma ensures an easy application and removal of the garment and of a collecting bag combined with a sufficient support next to the stoma.
